

Aminoclean range

Acetato de calcio 7%

Calcium acetate solution.

Soluble concentrate (SL)

Deficiency corrector

Fertigation

Foliar application

Application in hydroponics

Actions

Chloride- and sulphate-free liquid calcium complex designed to prevent and/or correct deficiencies and imbalances in the assimilation of calcium by crops. The composition of the product facilitates the absorption and movement of calcium through the plant, promoting Ca translocation to the fruits and terminal buds where Ca demand is greater.

Application period

Can be used throughout the vegetative cycle to prevent and/or cure calcium deficiencies and blossom end rot.

Organic production

Product suitable for use in organic production in accordance with Council Regulation (EC) No. 834/2007 of 28 June 2007 on the production and labelling of organic products, and subsequent modifications and extensions.

Guaranteed concentrations

Calcium oxide (CaO) soluble in water	7% (w/w)
pH	4-5

pH interval required to ensure stability of the chelate complex fraction: 3-9

Dosage

FERTIGATION

ALL	5 L/Ha
-----	--------

FOLIAR

VEGETABLES, PULSES	200-400 cc/100L of water. Apply every 10-20 days.
CITRUS, FRUIT, TROPICAL, OLIVE & GRAPEVINE	200-500 cc/100L of water. Apply every 10-15 days.

HYDROPONICS

ALL	2,5 L/Ha Per season, in proportional irrigations.
-----	--

Effective content

20 L

23,60-23,80 kg

1000 L

1130-1150 kg

1

Increases the thickness and elasticity of cell walls

2

Supplies calcium without increasing apical dominance
