

Aminoclean range

Humic 80

Humic acids

Soluble concentrate (SL)

Balanced soil structure

Fertigation

Actions

Acts as a soil conditioner, improving soil structure, buffering and ion exchange capacity. Humic 80 improves the physical, chemical and biological characteristics of the soil, boosting root development and enhancing the crop's ability to assimilate the available resources, leading to higher yields and improved crop quality.

Application period

Recommended for use prior to seeding or plantation, and during the first third or first half of the crop cycle.

Guaranteed concentrations

Humic extract	81,5% (w/w)
Humic acids	57% (w/w)
Fulvic acids	24,5% (w/w)
Nitrogen (N) total	1,2% (w/w)
Potassium oxide (K ₂ O) soluble in water	7,6% (w/w)
pH	9
Copper (Cu) total	5,30 mg/kg
Zinc (Zn) total	17,50 mg/kg

Heavy metal content within authorized limits for this classification. Class A.

Dosage

FERTIGATION

VEGETABLES, PULSES	5-10 kg/Ha 6-10 repeat applications every 10-15 days
CITRUS, FRUIT, OLIVE, GRAPEVINE & ORNAMENTAL	2,5-3,5 kg/Ha Repeat every 10-15 days

Effective content

5 kg

1

Increases assimilation of mineral nutrients and improves soil structure, fertility and water-retention capacity
