balance

Fertigation

Foliar  
application

Application in  
hydroponics

## Actions

This product has been specially designed to improve the plant's resistance to situations of environmental stress, with its high glycine betaine content and balanced composition of amino acids obtained by acid hydrolysis from vegetable proteins.

## Application period

Recommended for use throughout the vegetative cycle to promote growth of adequate foliar area, development of vegetable organs to be harvested, and resistance to diverse situations of stress.

## Guaranteed concentrations

Free amino acids	21% (w/w)
Nitrogen (N) total	1,19% (w/w)
Organic nitrogen (N)	1,19% (w/w)
pH	6,5-7,5
Copper (Cu) total	0 m/kg
Zinc (Zn) total	0 m/kg

Heavy metal content within authorized limits for this classification. Class C.

Denomination: Amino acids. Group 4.1.01 of Royal Decree 999/2017, of 24 November, which amends Royal Decree 506/2013, of 28 June, on fertilizer products.

## Effective content

20L

23,4-23,6 kg

5L

5,85-5,90 kg

## Dosage

### FOLIAR

VEGETABLES, PULSES	500-550 cc/100L	From onset to midway through flowering.
CÍTRICOS	400-650 cc/100L	

\*Apply in a single application when 90-100% of blossom has dropped, or in two applications at 75% and 100% of blossom drop.

### FERTIGATION

VEGETABLES, PULSES	4-6 L/Ha	At onset of flowering or during the cycle.
FRUIT	4-6 L/Ha	As the fruit begins to change colour.
OLIVE	1 L/100L	At onset of flowering.

### HYDROPONICS

VEGETABLES, PULSES	2-3 L/Ha	At onset of flowering or during the cycle.
-----------------------	----------	--

1

Improves fruit set and prevents microcracking.

2

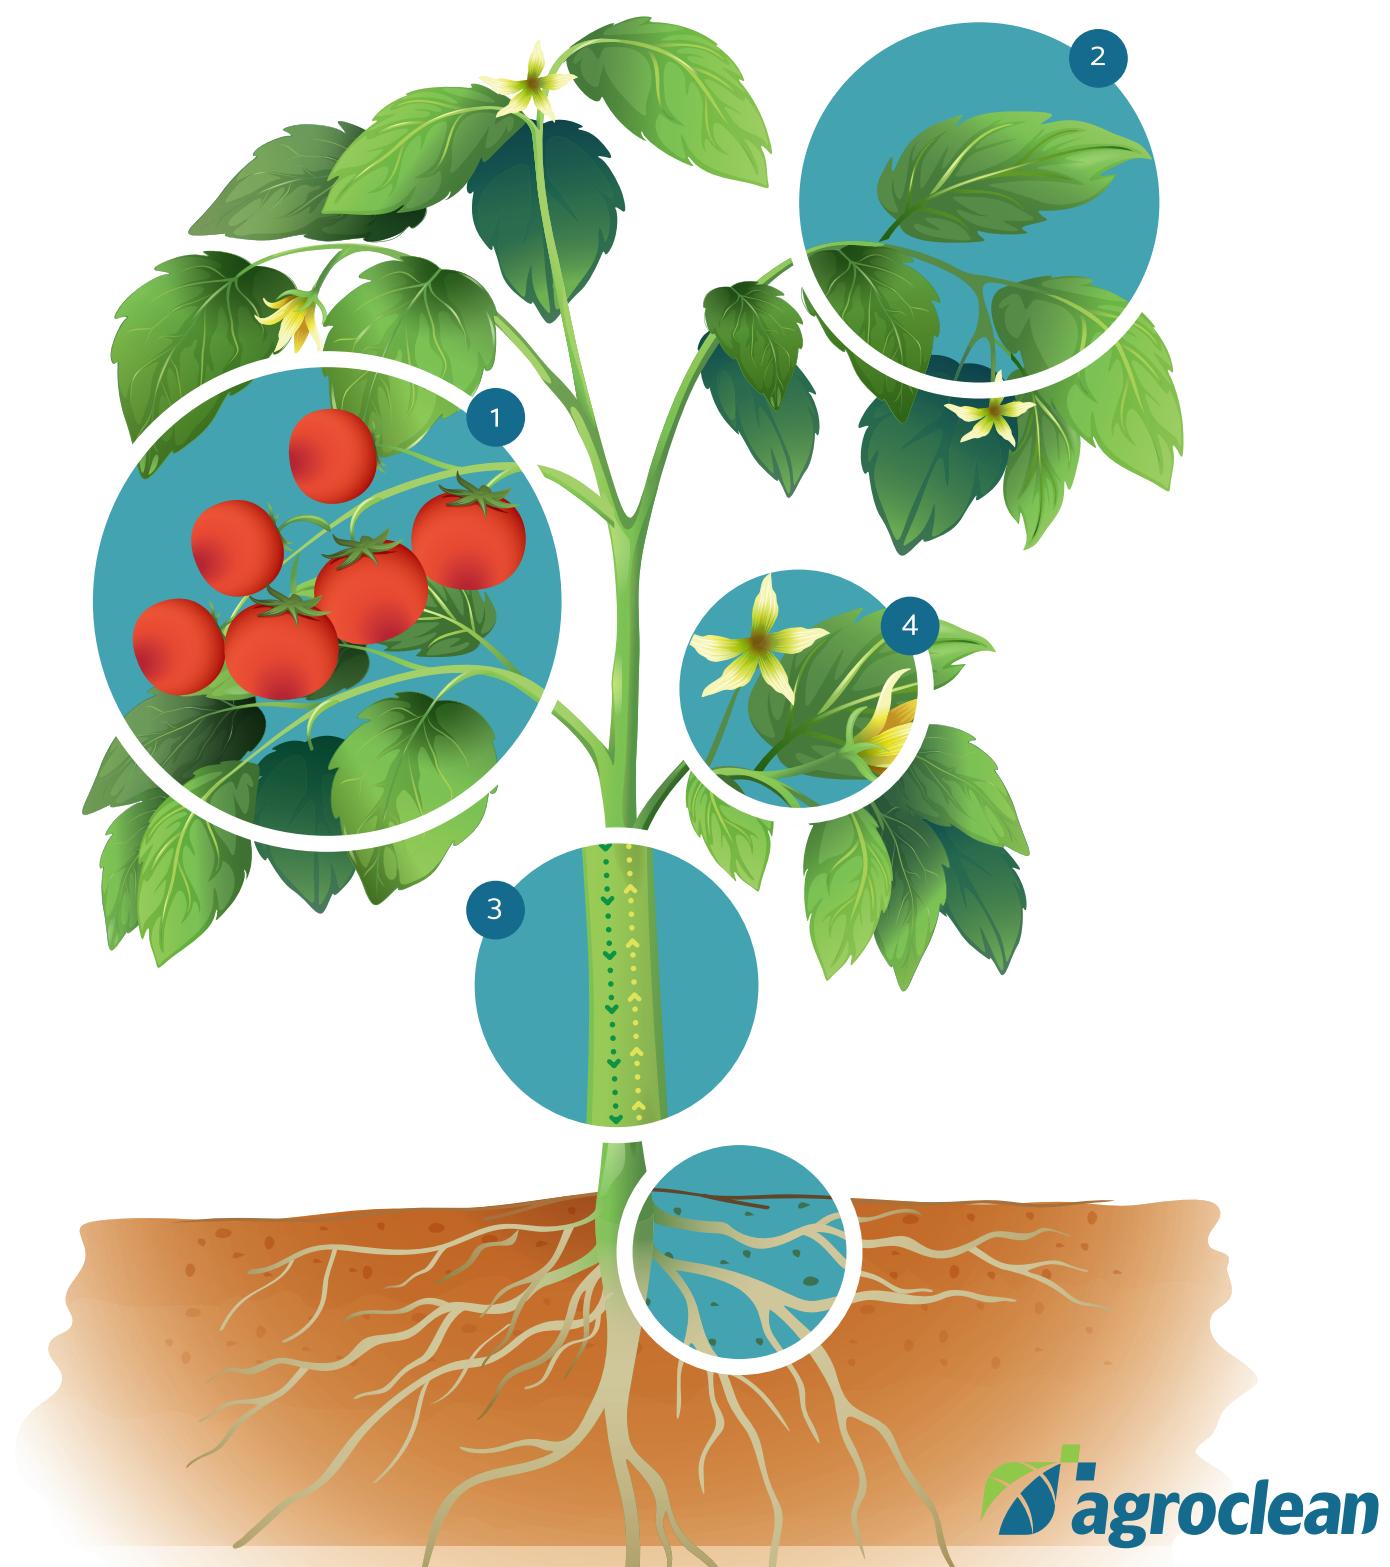

Effectively minimizes thermal stress produced by heat or cold.

3

Helps correct osmotic imbalance produced by hydric or saline stress.

4

Prevents blossom drop and improves blossom quality.
